

Redmond Consulting, Inc.
Recruiters to the AEC Transportation Marketplace
AVIATION SURFACE RAIL TRANSIT

Current Search Bulletin #320

Position: Transportation Engineer, Project Manager, Traffic

Location: California

An outstanding opportunity exists for a midlevel Traffic Engineer to join a team of pre-eminent experts within this niche consulting firm in the Western US.

The firm is in a position which is both enviable and unfortunate: They are turning away work which actually meets their stringent criteria for acceptance. This situation is enviable because it means the funnel of quality, challenging projects is full; it's unfortunate because turning away desirable projects is no way to operate a business!

This firm's capacity for growth is limited only by their ability to find top shelf personnel who fit within the existing team both technically and professionally.

- Are you passionate about your work?
- Do you enjoy working with your agency clients and providing your skills to improve your community's mobility?
- Do you crave challenging projects with multimodal considerations?
- Do you desire to build upon your current technical toolbox, and are anxious to learn on a continual basis?
- Are you a degreed Traffic Engineer with a MINIMUM of 3 years professional consulting experience who is eligible to work in the U.S.?

If you responded in the affirmative to the questions above, and would like to learn more about current position(s) available within this firm in Southern and Northern CA, please contact **Josie Summa** at **904-683-7000**, or submit your resume or project credentials to **resumes@redmondsearch.com** (subject line: "Resume 320"), or **fax** the same to: **413-215-6352**. **All inquiries will be handled on a confidential basis.**

Relocation Assistance is provided for this position.

*Redmond Consulting Inc. is a professional search and recruiting firm which exclusively serves the AEC transportation markets. Within aviation, surface, rail and transit space, we identify top flight professionals in engineering, planning, architecture and the sciences who bring with them the experience and skills that advance both careers and organizations. **Good Luck!***
