

Redmond Consulting, Inc.
Recruiters to the AEC Transportation Marketplace
AVIATION SURFACE RAIL TRANSIT

Search Bulletin #344

Position: ITS Engineer

Location: Tampa, FL

We represent an accomplished boutique consulting firm which focuses in the Traffic Engineering and ITS markets nationwide. This firm enjoys an excellent reputation with clients on the East and West coasts. Growth in the Tampa market has created the opportunity to grow the ITS market segment, resulting in a search for an additional ITS Team member.

Within this team, an ITS Engineer is responsible for planning, research, design, and development of state of the art traffic signal and intelligent transportation systems.

Responsibilities also include comprehensive system design, including preparation of plans, specifications and estimates and system engineering/integration along with development and implementation oversight, including hardware and software installation.

Additional responsibilities include business development, proposal preparation, project management and budget control.

Ideal qualifications:

- BS/MS in Civil or Transportation Engineering, Electrical or Systems Engineering or related engineering discipline;
- 5 + years transportation systems industry experience;
- Excellent verbal and written communication skills with experience preparing technical reports;
- Florida PE (or capability to obtain Florida PE within one year) and
- Experience with business development
- AutoCAD proficiency is a plus.
